

FAISAL NOUSHAD

Unity Game Developer

+91 7561896478 · faisalnoushad11@gmail.com · Kollam, Kerala · [LinkedIn](#) · [GitHub](#) · [Portfolio](#) · [itch.io](#)

SUMMARY

Unity Game Developer with shipped experience across 2D, 3D, and WebGL - from puzzle-platformers to co-op games to client freelance prototypes. Recently worked on a solitaire mobile game at Infocom Software, working across the full prototype-to-playtest pipeline. Skilled in C#, Unity architecture, and game feel systems, with a strong focus on player feedback, performance, and clean cross-functional collaboration.

PROFESSIONAL EXPERIENCE

Associate Game Developer - Infocom Software Private Limited Nov 2025 – Apr 2026 · Kochi

- Implementing and owning the full animation layer for a solitaire mobile game, working within a multidisciplinary team from prototype to playtest.
- Conducting structured playtesting sessions to identify feel issues, animation timing problems, and UX inconsistencies before build submission.
- Mentored junior developers on Unity architecture and C# best practices, improving code quality and consistency across shared systems.
- Diagnosed and resolved complex Unity issues - UI performance bottlenecks, memory leaks, and asset GUID conflicts in version-controlled environments.
- Conducted a technical workshop on Unity game development at MES College of Engineering and Technology.

Freelance Unity Developer - Self-Employed MAY 2026 – Present

- Built and shipped multiple Unity 3D prototypes across varied genres - courier simulators, puzzle games, and arcade games - for different clients end-to-end.
 - Tuned player movement, physics, and collision response across projects to hit the specific game feel each client needed.
 - Managed client communication, feedback cycles, and iterative builds independently using Discord and Google Docs.
-

PROJECTS

AI-Based XOX Game Unity | C# | Game AI | Gameplay Systems

[Play in unity](#)

- Developed a single-player XOX game with AI difficulty levels.
- Implemented minimax-based AI for optimal move prediction.
- Built board-state management and win/draw evaluation systems.
- Added gameplay animations, sound effects, and responsive UI.
- Optimized performance using Unity Profiler and debugging tools.

FPS Survival Shooter Unity | C# | FPS Mechanics | AI Systems

- Developed an FPS game with movement, aiming, shooting, and recoil mechanics.
- Implemented raycast shooting, hit detection, and health systems.
- Designed enemy AI with patrol, chase, and attack behaviors.
- Built weapon switching, reload, and ammo management systems.
- Optimized gameplay using object pooling and efficient scripting practices.

CORE COMPETENCIES

Engine: Unity 2D · Unity 3D · Animator & Timeline · Physics Systems · Unity UI · DOTween **Systems:** Enemy AI & Pathfinding · Object Pooling · ScriptableObjects · Coroutines · Addressables **Skills:** Game Feel & Player Feedback · Particle VFX · Mobile AR Fundamentals · WebGL Deployment **Tools:** C# · GitHub · Unity Collab · Discord · Google Docs

EDUCATION & CERTIFICATION

Diploma in Unity Game Development - Big Boy School of Gaming, Kochi Oct 2024 – Apr 2025

Hands-on curriculum in Unity 2D, Unity 3D, and C# across multiple shipped projects.

Bachelor of Commerce in Computer Applications (Pursuing)

University Institute of Technology, Mulankadakam, Kollam
